

The JWA lifeboat load test water bags are an essential tool for any marine operation that requires regular load testing. They are a cost-effective and efficient solution that can save you time and money compared to using fixed weights. Additionally, they are lightweight and easy to store, making them a convenient solution for marine operations with limited storage space and regular transportation.

They come in a variety of sizes to accommodate different load capacities. We offer bags ranging from 75 kg to 500 kg in weight.

DESCRIPTION	MODEL	PART NUMBER	LOAD CAPACITY
Lifeboat Bag 75 kg	LB75KG	712723	75 KG
Lifeboat Bag 100 kg	LB100KG	712724	100 KG
